Launch of Morocco's roadmap for artificial intelligence in support of educational reform

January 12, 2026

Mr. Mohammed Saad Berrada, Minister of National Education, Preschool, and Sports, participated on Monday, January 12, 2026, in Rabat, in the launch of the "AI Made in Morocco" artificial intelligence roadmap. Representatives from several government departments and relevant institutions were present, as part of the Kingdom's ongoing digital transformation. This participation aims to support investment in artificial intelligence for the development of the education system and to promote digital innovation within schools, in line with the objectives of the 2022–2026 Roadmap and the Ministry's strategy to improve the quality of learning by expanding digital skills and strengthening pedagogical innovation. The meeting also included the signing of a partnership agreement designed to enhance the integration of artificial intelligence into training programs, support the development of educational programs, and train pedagogical and technical staff to meet the needs of the job market and the demands of the digital transformation. The event also saw the official launch of the “JAZARI

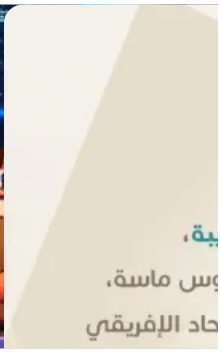

and development laboratory to establish continuous cooperation through scientific and technical exchanges, workshops, seminars, co-design sessions and national skills strengthening programs.
